

### Key Content (New Learning)

Be able to classify by different characteristics	Be able to explain patterns in findings from investigations	Explain how to classify plants and animals based on specific characteristics.	Explain the process of evolution.
Lesson 1  Lesson 2  Lesson 3  Lesson 4  Lesson 5  End point	To know what animal adaption is.  To understand plant adaptations.  To explore what evolution is.  To know who Charles Darwin is.  To understand natural selection.  To know what Darwin's finches is.	Adaption – the biological mechanism by which organisms adjust to new environments or to changes in their current environment.  Habitat – the natural home or environment of a plant, animal, or other organism.  Characteristics – the distinguishing features of an organism  Evolution – a process that results in changes in the genetic material of a population over time
